Premium Single Origin Matcha latte.

A special matcha latte made with 100% Okumidori, a single variety of tea leaf grown in Wazuka, the largest production area for Uji tea.
While most commonly available matcha is blended with powdered green tea or similar ingredients, our matcha is deliberately "single origin," so that you can fully enjoy the rich taste and flavor that matcha naturally has.

"Single origin" means "a single variety grown on the same farm." It refers to tea grown in an environment where everything is known, from the production area, producer, variety and production method to the cultivation management of the tea garden and even the health of the tea leaves.

So that you can enjoy the natural flavor of matcha to the fullest, we sweeten this latte only with kibi sugar (cane sugar). The result is a matcha latte that is not too sweet and lets you taste "the real flavor of matcha."
